

About System Check

A system check is automatically performed when you select the System Check link on the Sign in page or at the top-right of any Benchmark Universe page. It confirms your hardware and software compatibility based on Benchmark Universe system requirements.

About System Requirements

System Requirements provide you with information about the type of hardware and software you need in order for Benchmark Universe resources to operate effectively and run smoothly. We want our teachers and students to have the best user experience so periodically check out our system requirements to get the latest information on supported devices, operating systems, browsers, and more.

System Requirements by Device, Whitelist, Cookie Settings, and Javascript

For the Technical Administrator setting up Benchmark Universe

We recommend that you run a system check on each configuration used in your district by using the System Check link. In addition, Benchmark Universe URLs must be added to your whitelist to ensure that all Benchmark Universe resources are recognized as safe websites to use. See Whitelist for more information.

About Cookies

You must allow cookies from our Assessment Platform partner; Linkit, if your school district has a policy that prohibits the use of third party vendor cookies.

About Javascript

Javascript must be enabled in order for Benchmark Universe to load properly. The following message is shown if Javascript is disabled on any computer in your school or district.

- **Javascript is disabled.** Please enable Javascript and refresh the page in order to use Benchmark Universe.

For Teachers using Benchmark Universe

Check with your Technical Administrator if Benchmark Universe resources or pages are not loading properly and ensure that the URLs have been added to your school or district's whitelist.

We have organized our system requirements by device type so that it's easy for you to look up the information you need.
